Gauri Katti

Frontend Engineer — React.js — JavaScript — TypeScript
gaurikatti2806@gmail.com | +91-8080324256 | LinkedIn | GitHub | Portfolio

Summary

Frontend Engineer with 2.8+ years of combined experience building scalable, production-grade web applications using React.js, JavaScript, and TypeScript. Experienced in reusable UI components, component architecture, state management, REST API integration, real-time communication using Server-Sent Events (SSE), and frontend performance optimization. Skilled in asynchronous JavaScript, React Hooks, debugging, root-cause analysis, and frontend testing using Jest and React Testing Library.

Experience

Connecticus Technologies Pvt Ltd (Client: Siemens DISW) Pune, India
Software Development Engineer *Mar 2025 – Present*

- Developed and maintained production-grade React.js modules for Teamcenter Active Workspace using JavaScript, React Hooks, and reusable UI components to deliver responsive frontend features.
- Integrated frontend APIs for an AI-powered multi-agent Orchestrator workflow, using Server-Sent Events (SSE) to display real-time agent execution status, progress updates, intermediate messages, and final responses.
- Implemented polling-based asynchronous response handling using setInterval, with loading and execution states to track workflow progress and present agent-wise results.
- Optimized frontend performance by reducing unnecessary REST API calls, preventing redundant React re-renders, implementing debouncing, removing redundant event publishers, and optimizing batch job calls.
- Increased Jest and React Testing Library coverage by 27%, resolved production issues through debugging and root-cause analysis, and helped reduce the critical defect backlog to zero.

Connecticus Technologies Pvt Ltd (Client: Siemens DISW) Pune, India
Graduate Trainee Engineer *Aug 2024 – Feb 2025*

- Investigated and resolved frontend issues in Teamcenter Active Workspace, improving exception handling, application reliability, and user-facing functionality.
- Performed debugging and root-cause analysis of production issues and collaborated with cross-functional teams to understand requirements and deliver reliable software fixes.

Connecticus Technologies Pvt Ltd Pune, India
Software Development Engineer Intern *Jan 2024 – Jul 2024*

- Developed React.js frontend features, integrated REST APIs, and contributed to responsive web application workflows.
- Integrated Jira APIs to support automated task-tracking workflows using React.js and Postman.

Technical Skills

Frontend: React.js, JavaScript (ES6+), TypeScript, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, React-Bootstrap
State Management: React Hooks, Context API, Redux Toolkit, Custom Hooks
Performance Optimization: Memoization, Lazy Loading, Code Splitting, Virtualization, UI Rendering Optimization
API Integration: REST APIs, Axios, Server-Sent Events (SSE), Asynchronous API Handling, Polling
Testing: Jest, React Testing Library
Tools: Git, GitHub, Chrome DevTools, React DevTools, NPM, VS Code

Projects

AI-Powered Voice Task Management Platform | React.js, TypeScript, Node.js, Express.js, MongoDB

- Built a responsive task management application with AI-powered voice task creation, Kanban workflows, and reusable React components.
- Designed reusable frontend architecture using React.js and TypeScript, integrating REST APIs for task creation, updates, and workflow management.
- Optimized component structure and frontend workflows to improve maintainability, responsiveness, and user experience.

Achievements

- **AIR 9**, CodeSpire Ideathon organized by Acropolis Institute of Technology and Research.
- **1st Rank**, Smart India Hackathon Internal Round 2022 and TIAA Inter College Hackathon 2023.
- **Vice-Captain**, RNXG Robotics Team; represented the team at DD ROBOCON 2023, scoring 97/100 and 96/100 in competition rounds.

Education

Shri Guru Gobind Singhji Institute of Engineering and Technology Nanded, India
B.Tech in Computer Science and Engineering — CGPA: 8.28/10 *2020 – 2024*
